SUBJECT: Cosmos 1900 Response Exercise

In preparation for the possible uncontrolled reentry of Cosmos 1900, the Soviet nuclear powered satellite, the NSC will host a table top exercise involving all affected government agencies. The purpose of this exercise is to address agency responsibilities and procedures, under varying scenarios, as outlined in the interagency plan that supplements the Federal Radiological Emergency Response Plan (FRERP). This supplement was recently distributed by FEMA.

Agencies are requested to send a representative (and an alternate) to participate in this two-hour exercise, on August 24, at 8:00 a.m. in Room 208 of the OEOB. Agency representatives should be already familiar with the Cosmos supplement to the FRERP, and to the extent possible, should be the same agency representatives that would coordinate your

responses to the actual reentry of this satellite. The meeting will be held at the SECRET classification level. Attendees should ensure that building clearance information is provided to Sandy Wiley, 395-7393, by August 22.

Questions concerning the exercise should be addressed to Roger DeKok or Jim Miskel of the NSC staff at 395-7350/3055.

  
An Paul Schott Stevens
